

New User Guide

Introduction

Transform learner performance with games! Our library of games and easy-to-follow authoring tool enables anyone to create, publish, and share games in minutes, all while tracking user performance.

This guide introduces you to the administrative nuts and bolts of The Training Arcade® and includes a step-by-step guide to building your first game!

Our game authoring tool is managed with drop-downs, uploads (audio, image and video) and text input fields. No coding or programming skills are required.

 When you see this icon in the Admin Portal, hover over it to find a helpful game building tip.

.....Let's get started!

User Types & Permissions

Admin

1. Full authoring rights
2. Full administrative access to the sub-domain
3. Can add or remove users
4. Can view & edit all games
5. View and download all analytics

Creator

1. Full authoring rights
2. Can create games
3. Can only view or edit their own games
4. Can view analytics
5. Can add Player Lists

Viewer

1. Can only view analytics and leaderboard
2. No access to create, edit or delete games
3. Can lead Instructor lead courses, once permissions are granted

1. Introduction
2. User Types and Permissions
3. **Features**
 - a. Add/Delete Users
 - b. Create & Edit Games
 - c. Registration
 - d. Authorized Player Lists
 - e. Themes
 - f. Splash Screen
 - g. Privacy Policy
4. Reports and Analytics Export

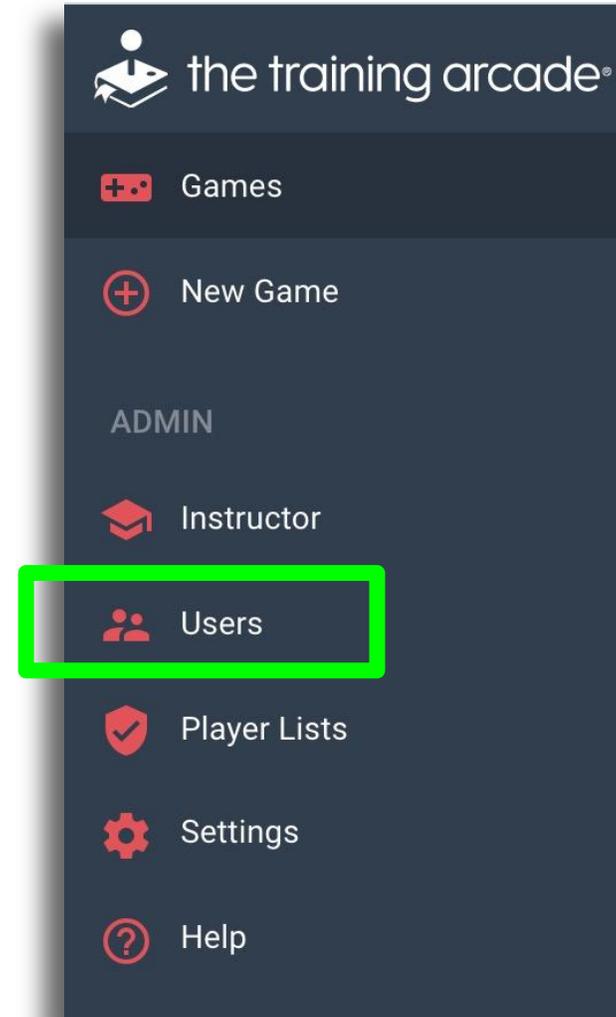

Adding a User

Adding a user to a subdomain is an Admin Only task.

Admins can assign Creator and Viewer roles.

Click on <Users> on the admin dashboard

*Players are not considered users and you do not need to add players via the Admin Panel. Your players will access the games from URLs and links shared directly with them using chat, email or via an LMS.

Adding a User

Click on **<Add a User>** in the top right corner of the screen

Complete all fields in the popup box

Click **<Save>**

The new user will receive an email inviting them to register with your subdomain.

*If the user does not receive the email, have them check their spam folder.

Users with open invites can be resent an invite at any time by clicking **<Resend Invitation>**

If the email is confirmed to be undelivered, the subdomain address may need to be whitelisted with the company IT dept. We can provide the URLs or static IP required for whitelisting.

Adding a User

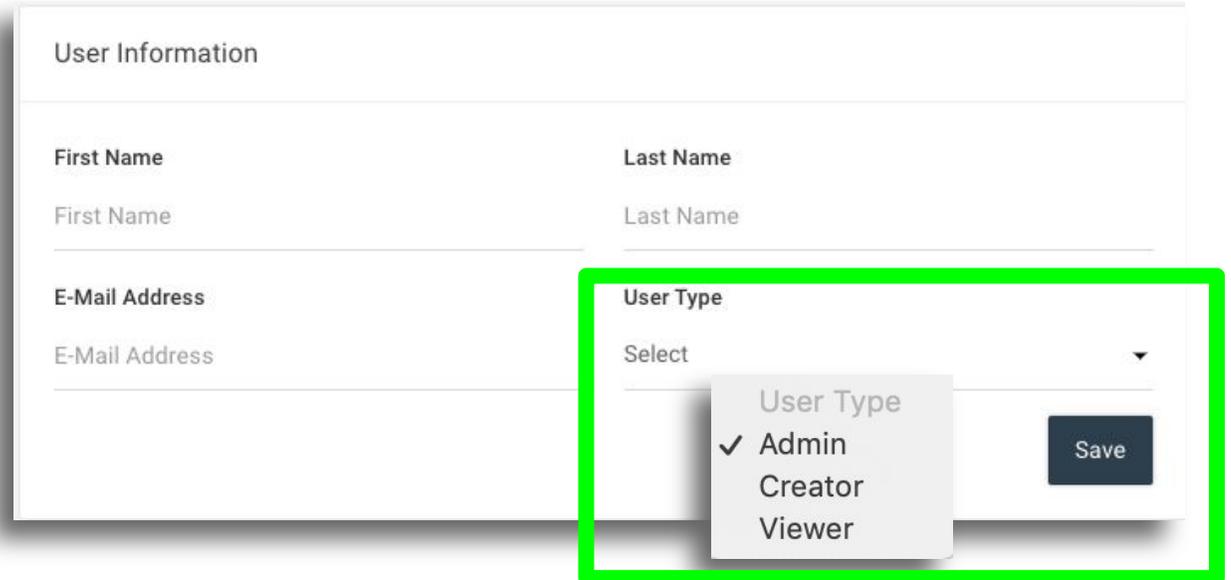

Select a <**User Type**> for the person being adding

Admin - Full access rights to the platform

Creator - Game creator rights

Viewer - Can lead Virtual Instructor Led games, view analytics and leaderboard

*See pg 4 for full details on each user type

The screenshot shows a form titled "User Information" with the following fields:

- First Name**: Input field with placeholder text "First Name"
- Last Name**: Input field with placeholder text "Last Name"
- E-Mail Address**: Input field with placeholder text "E-Mail Address"
- User Type**: A dropdown menu with the text "Select" and a downward arrow. The dropdown is open, showing three options: "Admin" (with a checkmark), "Creator", and "Viewer".
- Save**: A dark blue button located to the right of the dropdown menu.

The "User Type" dropdown and its options are highlighted with a green border.

User Custom Fields

Custom Fields are used for a creator or admin to limit viewing to a specific existing Custom Field.

Switch limit viewing to **<Yes>**

Then select the fields to be added from the Dropdown menu by selecting the checkbox.

Click **<Save>**

Once these fields are added the creator or viewer will only see data associated with these fields.

Custom Fields

Limit Viewing Based On Registration Field

Yes

Select From Existing Fields

Select...

User Permissions

Admins can create Permissions on the game level and allow creators or viewers access to other games by tethering the games between user type.

As the builder of an ILT game you will need to add permissions to another user (viewer or creator) in order for them to lead the sessions.

Click on **<Permissions>** in the menu bar.

Click into the dropdown of the type of user to be given permissions.

Choose the user and then click **<Add>** then **<Save>**

You can also toggle to **<Allow All>** to add all Creators or Viewers to a game.

The screenshot shows the 'Permissions' page for the game '90s Pop Culture 2x2'. The interface is divided into two main sections: 'Add Creators' and 'Add Viewers'. Both sections have a toggle switch for 'Allow All' in the top right corner, which is highlighted with a green box. In the 'Add Creators' section, a dropdown menu is open, showing a list of users: Gabriel Groenendaal (gabriel.groenendaal@thegameagency.com), Greg Nikolaev (greg.nikolaev@thegameagency.com), and Lynn Kirchenberg chate (lynn.kirchenberg@thegameagency.com). This dropdown is also highlighted with a green box. In the 'Add Viewers' section, a dropdown menu is open, showing a list of users: Chad Hale (halechad@hotmail.com). This dropdown is also highlighted with a green box. The left sidebar contains the 'the training arcade' logo and navigation options: Back, STATS (Analytics, Leaderboard), and ADMIN (Edit Game, Permissions, Play Game). The 'Permissions' option is highlighted with a green box.

User Permissions

If you would like someone else to host the Instructor game during your next virtual or live training event, you will need to add them as a Viewer on the game.

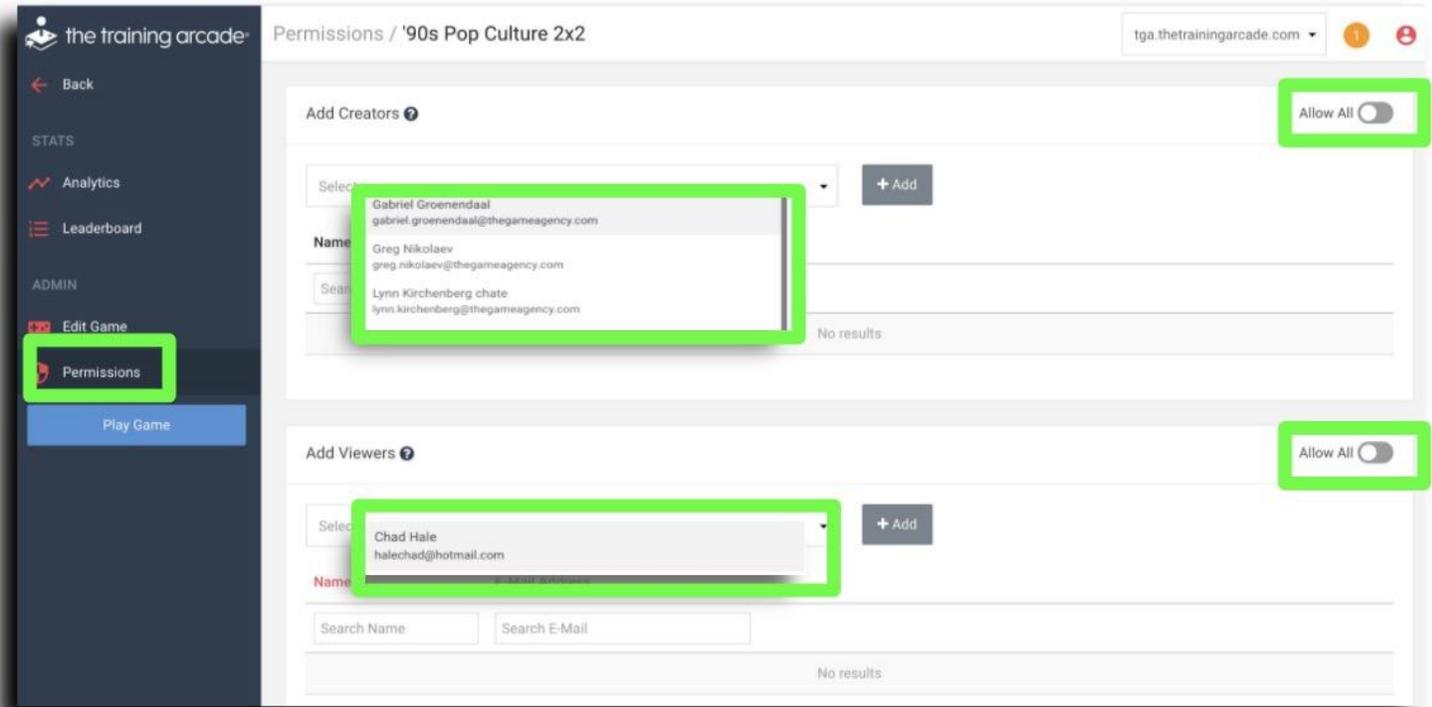

Step 1 - In the Users section, make sure to add the new person as a Viewer.

Click **<Add a User>** and then enter their name and email.

Next select the **<Viewer>**, once saved the new viewer will receive a welcome email asking them to click a link to accept the invitation and set up their own username and password.

Step 2 - Go into the specific game in which you want to grant permission and click the **<Permissions>** tab.

Under the Viewer section, scroll through your list of viewers to the viewer you want to give permission and click **<Add>**

Transferring Games

Click on **<Users>** on the admin dashboard

From the **<Users>** menu

From the list locate the user name you wish to receive the ownership of the games.

Click **<Edit>**

Next from the **<User Information>** popup, click on the 3 red dots (top right).

Then click **<Transfer>**, select the user to receive ownership of the transferred game.

Click **<Submit>**

The screenshot shows the 'Edit User / Chad Hale' page. The 'Transfer Games' button is highlighted in green. A 'Transfer Game Ownership' modal is open, showing a list of users to transfer games to. The user 'Allan Rust' is selected and highlighted in green. The 'Submit' button in the modal is also highlighted in green.

Transfer Game Ownership

Transfer games created by Chad Hale to:

Name	Email	User Type
Allan Rust	allan.rust@theagency.com	Admin
Amanda booe	amanda.booe@theagency.com	Admin
Brian McMillan	brian.mcmillan@theagency.com	Admin

Cancel Submit

Deleting a User

Click on **<Users>** on the admin dashboard

From the **<Users>** menu

Locate the user name you wish to delete

Click **<Edit>**

Next from the **<User Information>** popup

Click on the 3 dots (top right)

Click on **<Delete User>**

Click **<Submit>**

The screenshot shows the admin dashboard for 'the training arcade'. The left sidebar contains a menu with the following items: Games, New Game, ADMIN, Instructor, **Users** (highlighted with a green box), Player Lists, Settings, and Help. The main content area displays a 'Users' table with columns for Name, E-Mail Address, Games (Total, Players, Sessions), Arcades (Total, Players, Sessions), User Type, and Date Added. Two users are listed: Allan Rust and Amanda booe. The 'Amanda booe' row has a three-dot menu icon on the right. A 'User Information' popup is open for Amanda booe, showing fields for First Name (Amanda), Last Name (booe), E-Mail Address (amanda.booe@thegameagency.com), and User Type (Admin). The 'Delete User' option in the popup is highlighted with a green box. Other options in the popup include 'Transfer Games' and 'Save'.

Name ^	E-Mail Address	Games			Arcades			User Type	Date Added
		Total	Players	Sessions	Total	Players	Sessions		
Allan Rust	allan.rust@thegameagency.com	0	0	0	0	0	0	Admin	2019-02-01 02:52:06
Amanda booe	amanda.booe@thegameagency.com							Admin	2021-10-01 10:45:45

Creating a Game

In this section, we will cover only the **<Game Info>** tab. Individual game setup is available in another document.

Click **<New Game>** on the dashboard.

Next select the **<Game Type>** from the pop up menu.

Once the game type is selected, the admin or creator is taken directly to the **<Game Builder>**

The screenshot shows the 'the training arcade' dashboard. The 'Games' section is active, and the 'New Game' button is highlighted with a green box. A pop-up menu titled 'Select a Game Type' is displayed, asking 'Which type of game do you want to create?'. The menu lists eight game types: Jump, Match, Scramble, Recall, Trivia, Sort-it, Scenarios, and Jeopardy!. A 'Cancel' button is located at the bottom right of the pop-up menu.

Creating a Game

Set up your game details under the <**Game Info**> tab

- Choose <**Game Mode**>
 - Single Player
 - Instructor Initiated (Trivia only)
 - Instructor Led (Trivia and Jeopardy!®)
- Enter your <**Game Name**>
- **URL** - This field will auto-populate once you enter the game name
- Set your <**Default Language**>. The default language is used to automatically update the game buttons and info to the chosen language.
- We have a separate User Guide available for instructor led mode (ILT)in Jeopardy! and Trivia
 - Please visit The Training Arcade® Subscriber page or email support@elblearning.com to request a copy
- If your language of choice is not listed, we can work with you to add a new custom language to the CMS.

The screenshot shows a 'Game Information' form with the following fields:

- Game Type**: Jeopardy!
- Game Mode**: A dropdown menu with options: Select, Single Player (checked), and Instructor Led.
- Game Name**: A text input field.
- Name**: A text input field.
- URL**: A text input field with the value: <https://tga.thetrainingarcade.com/games/jeopardy/>
- Default Language**: A dropdown menu with the following options: English (US) (checked), English (UK), Hindi, 日本語 (Japanese), German, 简体中文 (Simplified Chinese), Spanish, French, Turkish, Portuguese, Italian, Russian, 繁體中文 (Traditional Chinese), 한국어 (Korean), Bahasa (Indonesian), and คนไทย (Thai).

Creating a Game

Define your <Timer Settings>

- Set a <Default Timer> per question
 - Enter the amount of time players have to answer each individual question. Once a time is entered in this field, each question will be set to this time as they are created.
 - If you would like to set a longer or shorter timer per question, this can be set on the questions tab and will override the game settings default timer.
- Pass % - Enter a percent of correct answers that players must achieve to pass, the result is shown on the Game Over screen.
 - This field is also required when using SCORM to publish games.

Creating a Game

Information Pop-Up

This feature is optional, but an extremely helpful tool to give your players an introduction to the game and material included within it.

There is a WYSIWYG editor that gives admins and creators to have more options when entering the details to the **<Body Text>**

Links/URL's can be added here, but will take players away from the game window to a new browser window. The player can transition easily back to the game.

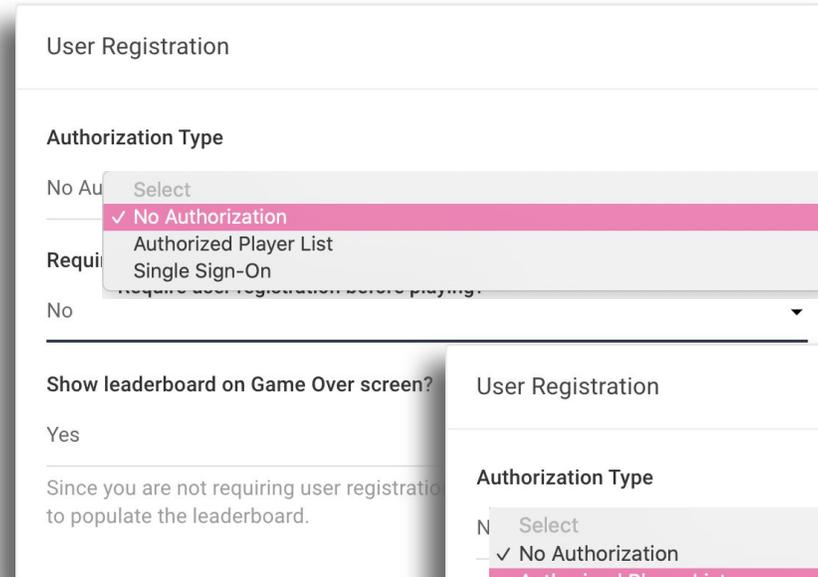

The screenshot displays a form titled "Information Popup (optional)" with a subtitle "Optional popup that appears after the splash screen." The form includes a "Title" field and a "Body Text" field. The "Body Text" field is highlighted with a green border and contains a rich text editor toolbar with icons for bold (B), italic (I), underline (U), strikethrough (ABC), bulleted list, numbered list, subscript (x₂), superscript (x²), font color (Normal), background color, text color (A), text background color (I), and link (chain icon). Below the toolbar is a text input area with the placeholder text "Enter text..."

Creating a Game

User Registration

Authorization Type:

- **No Authorization:** This setting allows player to play games in “anonymous mode”
- With the leaderboard turned on, the player is fully anonymous to others
- With the leaderboard turned on, the player will be asked to enter just initials for the leaderboard (max 3 characters)
- **Authorized Player List (APL):**
 - A player list can be created in Excel and loaded into the CMS using an Excel CSV file or manual data entry.
 - When an APL is in use, only players on the list can play the game. Anyone not approved to play will be presented with an unauthorized screen.

Creating a Game

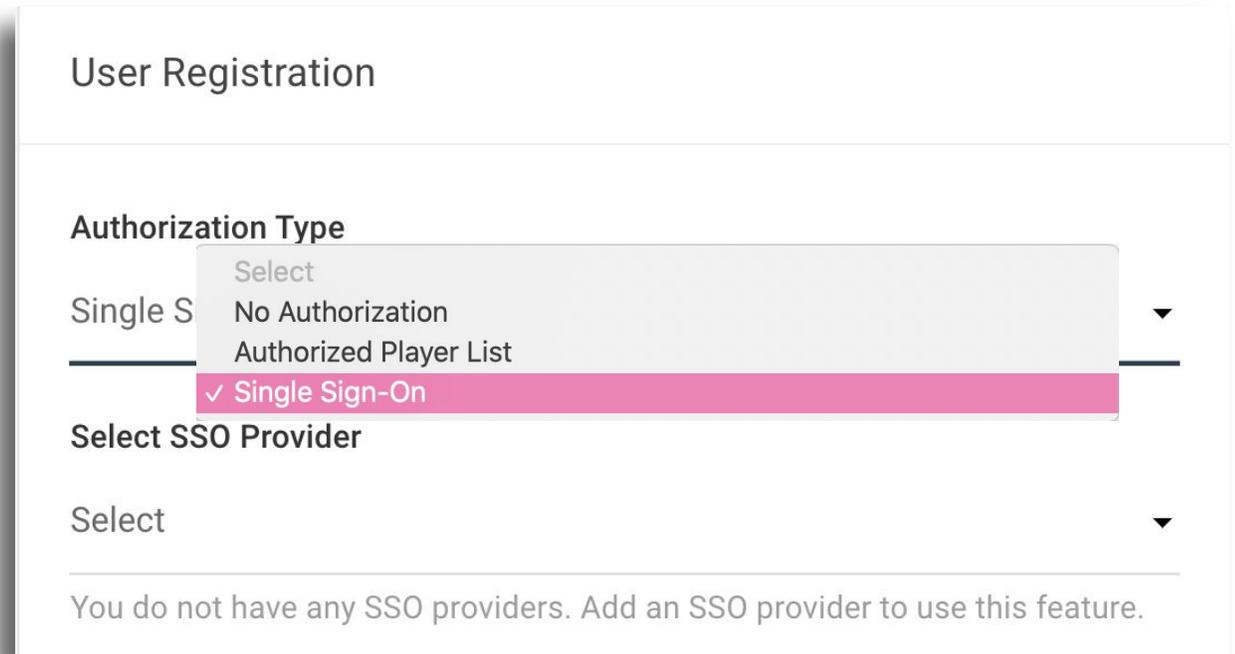

User Registration

Using SSO - The Training Arcade SSO is SP Initiated login, so there is no target URL. To utilize SSO for your subdomain contact support@elblearning.com for more details.

- You will need to add an idP to your subdomain in order to add SSO to a game.
- Once an idP has been added to the subdomain, the provider will now be made visible in this dropdown menu.

* If your IdP is not SAML compliant, we can work to customize the integration on a case-by-case basis. Please request a client consult in this event.

We can also provide URL's and/or a Static iP address in the event you need to whitelist the SSO within your organization.

The screenshot shows a web form titled "User Registration". It contains two dropdown menus. The first is labeled "Authorization Type" and has a dropdown menu open with the following options: "Select", "No Authorization", "Authorized Player List", and "Single Sign-On" (which is highlighted with a pink background and a checkmark). The second dropdown menu is labeled "Select SSO Provider" and has a dropdown menu open with the option "Select". Below the dropdown menus, there is a message: "You do not have any SSO providers. Add an SSO provider to use this feature."

We have a separate User Guide available for SSO integration

Please email support@elblearning.com to request a copy

Creating a Game

User Registration

If you require players to register prior to playing your game, toggle this field to “yes”

A new section will open on the page.

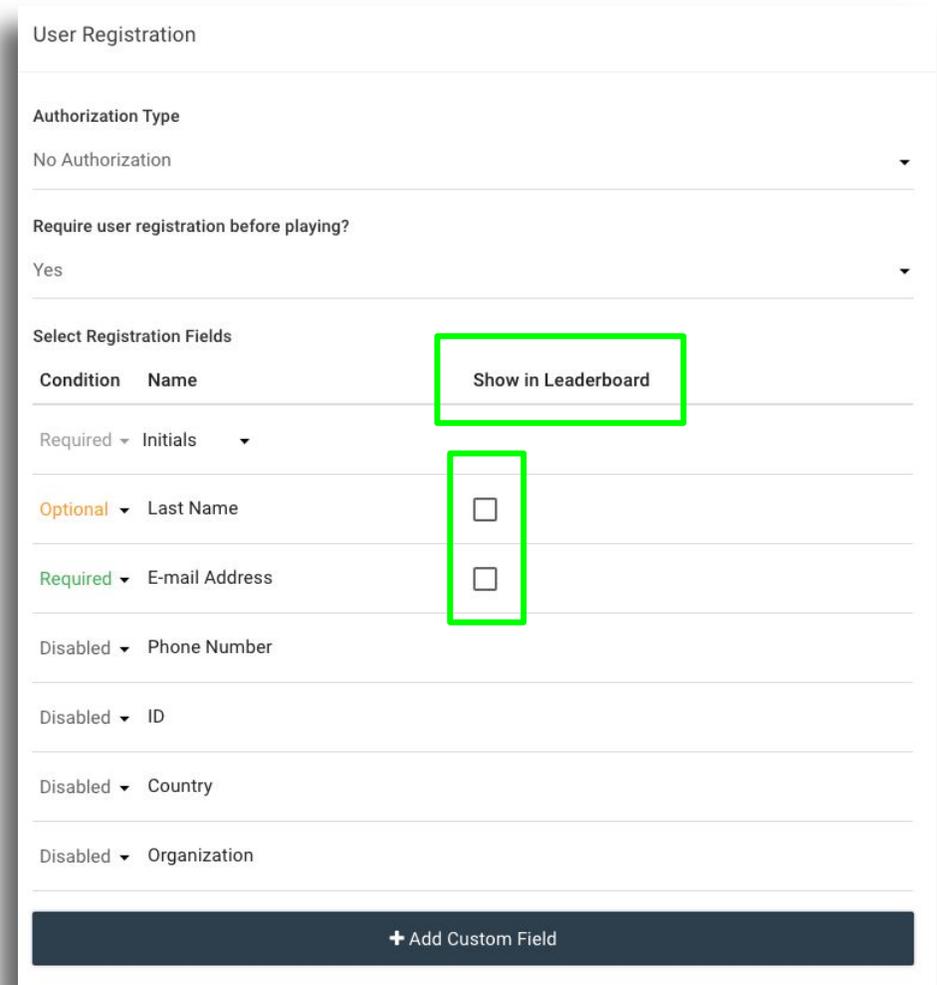

- Initials or First Name are required
- If Email is disabled, ID will then be required - Email or ID are considered Unique Identifiers in our platform and will be valuable when using the analytics and data exports.

Show in Leaderboard

Check this box if you would like up to 2 more fields shown on the leaderboard, for a total of 5 fields (incls custom fields).

We have a separate User Guide available for Custom Registration setup

Please email support@elblearning.com to request a copy

Creating a Game

User Registration: Custom Fields

We added a new feature that helps slice and dice the analytics even more! Click on **Add Custom Field** and a new popup appears.

Choose from:

- **Text Entry:** Here the players will enter the requested information manually.
- **Dropdown Menu:** Create a list of options for the player to select from when registering.

These fields can be used for capturing a variety of additional information, but cannot be used to collect PII (Personally Identifiable Information) For more information on our PPI and GDPR policies click the link below.

<https://www.elblearning.com/legal/privacy-policy>

We have a separate User Guide available for Custom Registration setup

Please email support@elblearning.com to request a copy

The image shows two overlapping screenshots from a user registration configuration interface. The background screenshot is titled 'Select Registration Fields' and displays a table with columns for 'Condition', 'Name', and 'Show in Leaderboard'. The table lists several fields: 'Initials' (Required), 'Last Name' (Optional), 'E-mail Address' (Required), 'Phone Number' (Disabled), 'ID' (Disabled), 'Country' (Disabled), and 'Organization' (Disabled). Each row has a checkbox in the 'Show in Leaderboard' column. The foreground screenshot is a modal window titled 'Add Custom Field *'. It has two tabs: 'Add New Custom Field' and 'Select Existing Custom Field'. The 'Add New Custom Field' tab is active, showing a form with a 'Name' field (placeholder: 'Enter field name...') and a 'Type' dropdown menu. The dropdown menu is open, showing three options: 'Select' (checked), 'Text Input', and 'Dropdown'. Below the form, there is a disclaimer: '* Collection of personally identifiable information must comply with subscriber Privacy Policy. For a list of data fields which may not be collected Click Here'. At the bottom right of the modal are 'Cancel' and 'Submit' buttons.

Creating a Game

User Registration: Custom Fields

Create a **new custom field**
or

Select from **existing custom fields**

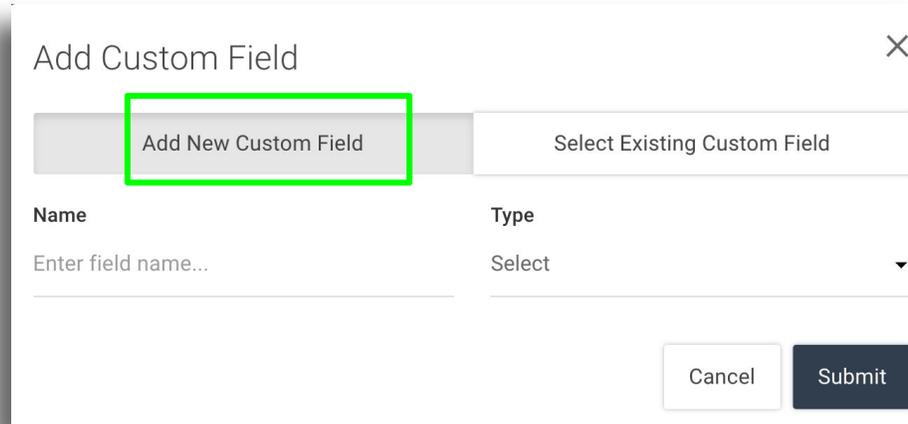

We recommend the dropdown menu option whenever possible to mitigate data complications caused by spelling or other inconsistencies like abbreviations.

*The existing custom field option will include all Custom Fields created across your subdomain.

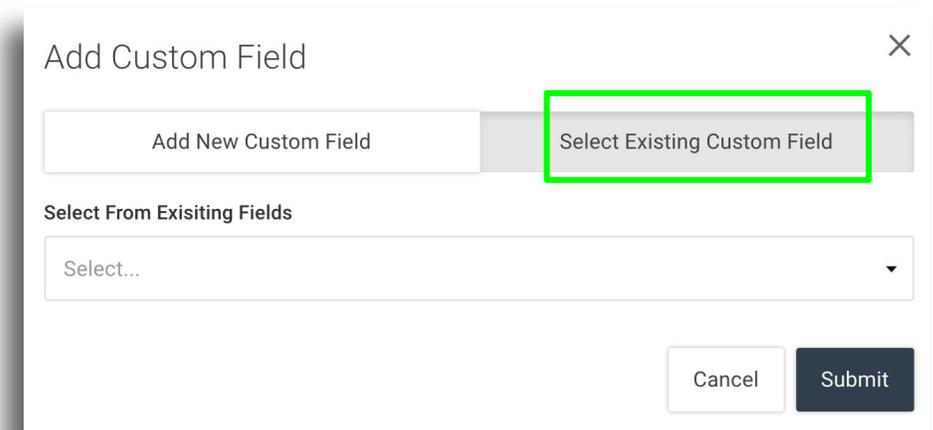

*The custom fields can also be included in the Game Over Leaderboard and analytics, by checking the **“Show in Leaderboard”** box

We have a separate User Guide available for Custom Registration setup

Please email support@elblearning.com to request a copy

The screenshot shows a dialog box titled "Add Custom Field" with a close button (X) in the top right corner. At the top, there are two buttons: "Add New Custom Field" (highlighted with a green box) and "Select Existing Custom Field". Below these buttons, there are two input fields: "Name" with the placeholder text "Enter field name..." and "Type" with a dropdown menu currently set to "Select". At the bottom right, there are two buttons: "Cancel" and "Submit".

The screenshot shows the same "Add Custom Field" dialog box. In this view, the "Select Existing Custom Field" button is highlighted with a green box. Below the buttons, there is a section titled "Select From Existing Fields" with a dropdown menu currently set to "Select...". At the bottom right, there are two buttons: "Cancel" and "Submit".

Session Limits

Session Limit: Date Range

The game builder now has several options for limiting game play.

The game **Start** and **End** dates can be set without the need for player registration.

The game will remain inactive until the start date and time and move to inactive once the end date and time has been reached.

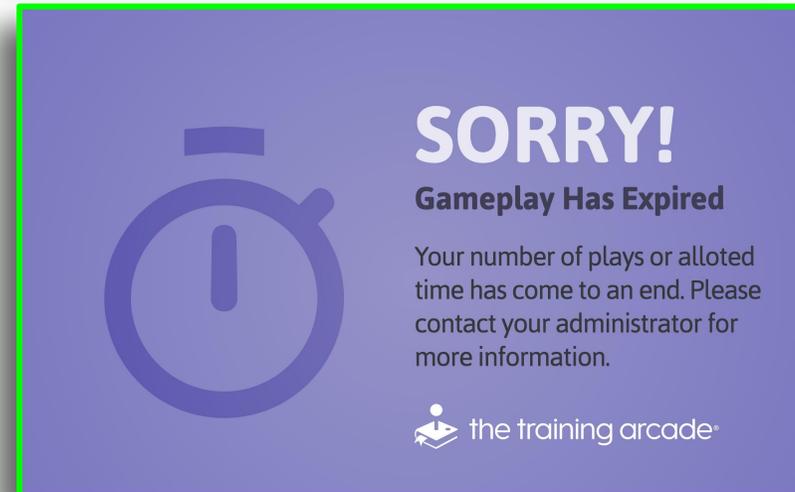

Once a player has reached the allotted amount of plays they will be presented with a 'Gameplay Has Expired' screen.

Limit the number of sessions a player can play?

No ▾

Game Start Date ? **Game End Date** ?

 Start date (optional)  End date (optional)

Session Limits

Session Limit: Session Play Limits

Session play limits are used in conjunction with registration and the Email field.

Once set to **<Yes>**, Sessions can be limited to a set number of plays and/or a combination of plays within a set date range.

It is important to note that limits are set on the lifetime of the game and any increase to plays should be incremental to the current play setting.

For example: To increase plays from 1 all time to 3 all time, the session limit must be raised to 3. However, if a game has been previously played this could impact the session counts so creating a new copy of the game is recommended.

Once a player has reached the allotted amount of plays they will be presented with a 'Gameplay Has Expired' page.

Limit the number of sessions a player can play? Yes	Session Limit Per Player 1 session(s)
Session Limit Start Date ? Limit start date (optional)	Session Limit End Date ? Limit end date (optional)
Game Start Date ? Start date (optional)	Game End Date ? End date (optional)

Creating a Game

Splash Screen

The Splash Screen is the first screen a player interacts with when they log in to play the game, and this is a fun way to add more branding to the game.

There are a few ways for an Admin or Creator to set up the splash screen:

- Upload your **Company Logo**
- Upload a **Game Title**
- Upload a **Game Image**

Adding a logo to the Splash Screen will also add a logo to the Leaderboard.

Locations and defaults are preset and cannot be changed without a custom theme.

For more information on creating a custom theme, contact: support@elblearning.com

The image shows a user interface for creating a game. On the left, there are three dropdown menus for selecting options. Red arrows point from these menus to the corresponding settings in the 'Splash Screen' configuration panel on the right. The 'Company Logo' dropdown is set to 'Upload Image', the 'Game Title' dropdown is set to 'Default', and the 'Background' dropdown is set to 'Default'. The 'Upload Image' panel shows a preview of a game splash screen with a logo that says 'YourLogo Here' and the title 'Quiz Jumper'. Below the splash screen settings is a 'Leaderboard' table with 10 rows. The first row is highlighted in purple and shows 'Victoria' as the player with a score of 0. A green box highlights a logo placeholder 'YOUR LOGO HERE' at the bottom left of the leaderboard.

Translations

All of the default global copy in our games can be automatically translated on the **Game Info** tab by changing the default language.

Once set, the **<Default Language>** will automatically update the game instruction buttons and any other text fields that are baked into the game.

We have a Translation Template that will assist in translating the game content in our games, with the exception of Jeopardy!® and Wheel of Fortune®.

We currently offer 16 languages.

If you are interested in adding an additional language as a custom service please contact: support@elblearning.com

Translations

To translate the created copy within the game, download the **“Translation Template”** and fill in the question details in the language of your choice.

Once the sheet is complete and saved, it can be uploaded and the game fields will be translated accordingly.

Multiple languages can be added to games, by selecting the language from the drop down menu on the Translations tab and clicking **<Add>** this will present a language picker to the player.

Players can toggle between selected languages on the Splash Screen prior to starting game play.

If you are interested in adding a language as a custom service please contact: support@elblearning.com

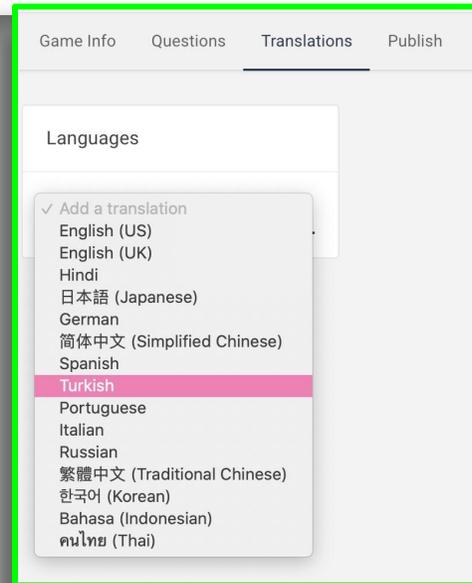

Translation Template

1. Download the template file and fill in the translation columns. Leave any translation columns blank for languages you do not want to include.

Download Template File

2. Upload your completed template file.

Upload Template File

Publishing Games

Under the **Publish** tab:

Embed Game - Use an embed code to place the game onto your website or anywhere else html is supported.

To embed a game within an iframe, use the **<i-Frame calculator>** to generate the appropriate embed code based on your LMS requirements.

SCORM - Export the games as a SCORM package (SCORM 1.2 or 2004) and load into your Learning Management System (LMS).

We support downloading zip files for SCORM 2004 and SCORM 1.2.

Add a **<Close>** button if you would like to allow players to close the game out of SCORM manually.

The screenshot shows the 'Edit Game / 20046 DC Booth' interface. At the top, there are three tabs: 'Game Info', 'Questions', and 'Publish', with 'Publish' highlighted by a green box. Below the tabs is an orange notification bar that reads: 'Note: Any changes you save in the editor will automatically deploy to your game.' To the right, a 'SCORM' panel is visible, featuring a toggle switch for 'Show Close button on Game Over screen' (which is currently turned off), and two red buttons for downloading SCORM files: 'SCORM 2004: 3rd Edition' and 'SCORM 1.2'. Below the SCORM panel is an 'Embed Game' section with a text box for instructions: 'Enter width and height to generate your iframe embed code.' At the bottom of this section, there are two input fields: 'Width (pixels)' with the placeholder 'Enter width...' and 'px', and 'Height (pixels)' with the placeholder 'Enter height...' and 'px'. These input fields are highlighted by a green box.

Authorized Player Lists

To create a new **“Authorized Player List”** click on **“Player Lists”** within your account.

Click **“Add a Player List”**

Enter a **“List Name”** and **“Add Email Addresses”** either by manual entry or by uploading a CSV file.

Player Lists can be used in the place of an Single Sign On as a way to ensure your games are played only by approved players or as a way to segment player groups.

If you make any changes to a list by removing or adding players, the lists on the games will need to be re-added as lists do not automatically update with the new information.

Multiple lists can be added to games.

User Segmentation Group 1

Authorized Player Lists

To add an **<Authorized Player List>** to your game you will need to create your Player List.

From the Main Menu select **<Player Lists>**

Click **<Add a Player List>**

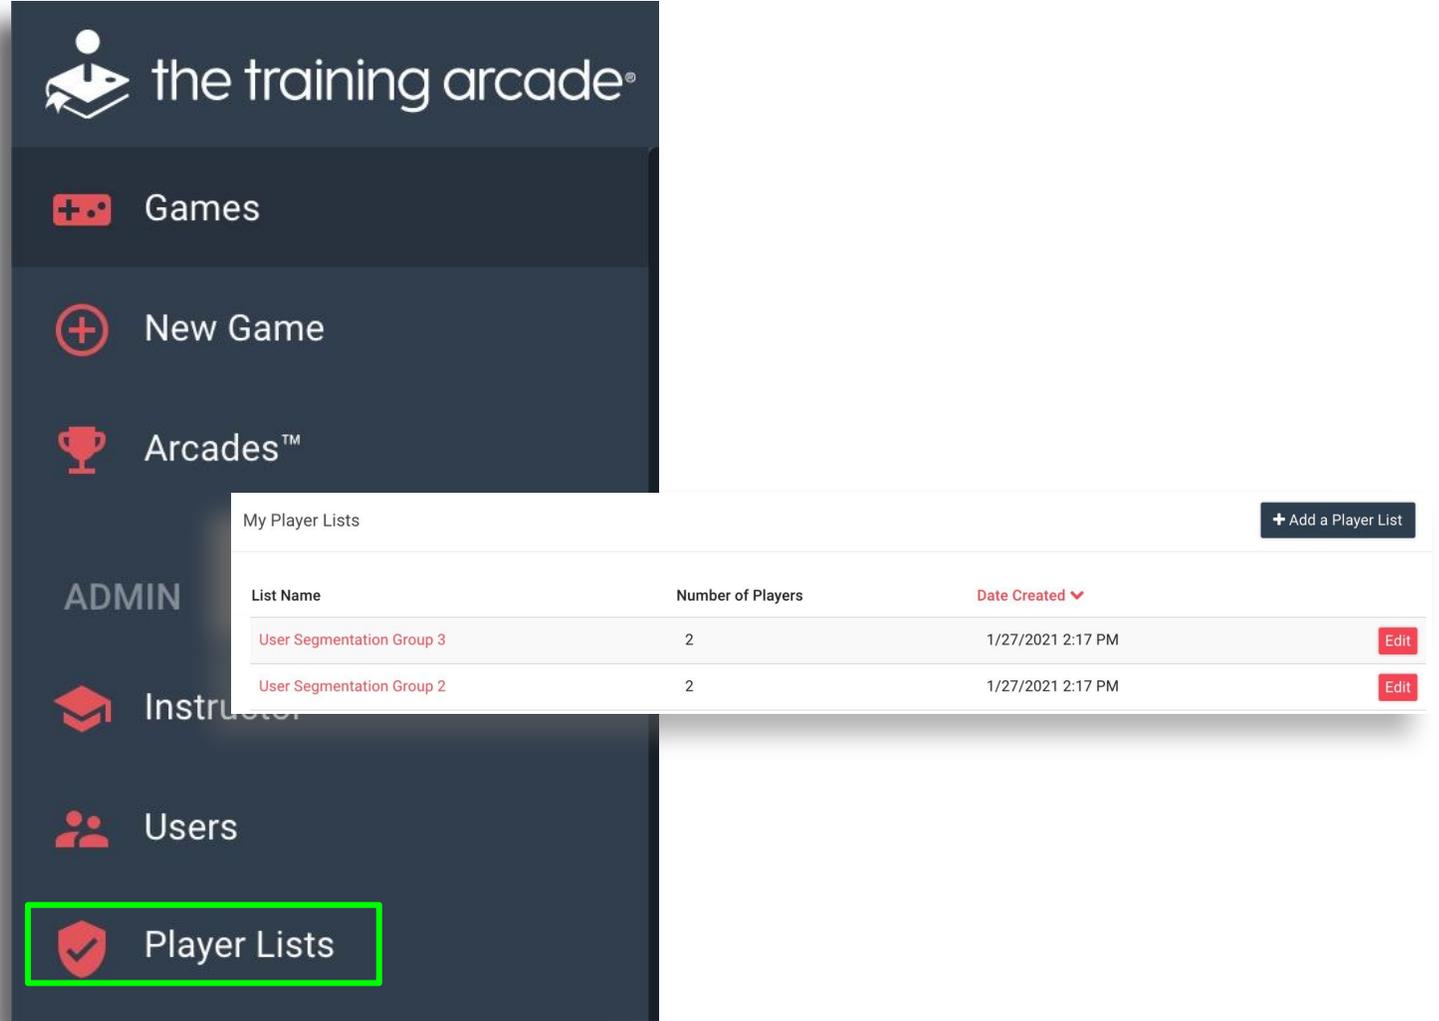

Next name your list for easy identification when multiple lists are available for selection by a creator.

Only players on the list will have access to the game.

More players can be added manually. Click **“Add Email Address”** and click **“Save”**.

Once added, all the players included in the list will display beneath the List Name.

Individual players can be removed at any time, by clicking **“Remove”**.

The screenshot shows the 'the training arcade' admin interface. The main menu on the left includes 'Games', 'New Game', 'Arcades™', 'ADMIN', 'Instructor', 'Users', and 'Player Lists' (highlighted with a green box). A modal window titled 'My Player Lists' is open, displaying a table with the following data:

List Name	Number of Players	Date Created	
User Segmentation Group 3	2	1/27/2021 2:17 PM	Edit
User Segmentation Group 2	2	1/27/2021 2:17 PM	Edit

The modal also includes a '+ Add a Player List' button in the top right corner.

Authorized Player Lists

Once the Player List has been added, turn on registration to require an email is entered by the players.

If a player with an email address included in the Player List attempts to access the game, they will be automatically given access.

An Admin or Creator can use as many or as few fields as they would like, but email is a requirement. Our system uses email as a unique identifier and will cross check the list with the players' email addresses.

Once this step has been completed, the players can play the game.

4. **Reports and Analytics Export**

Exporting Analytics

Reports can be easily exported from the Admin Portal for Games in bulk format or by individual game.

Individual Game Analytics Export

Select the **<Game>** from the Games Menu.

Then from the Game navigation panel select **<Analytics>**

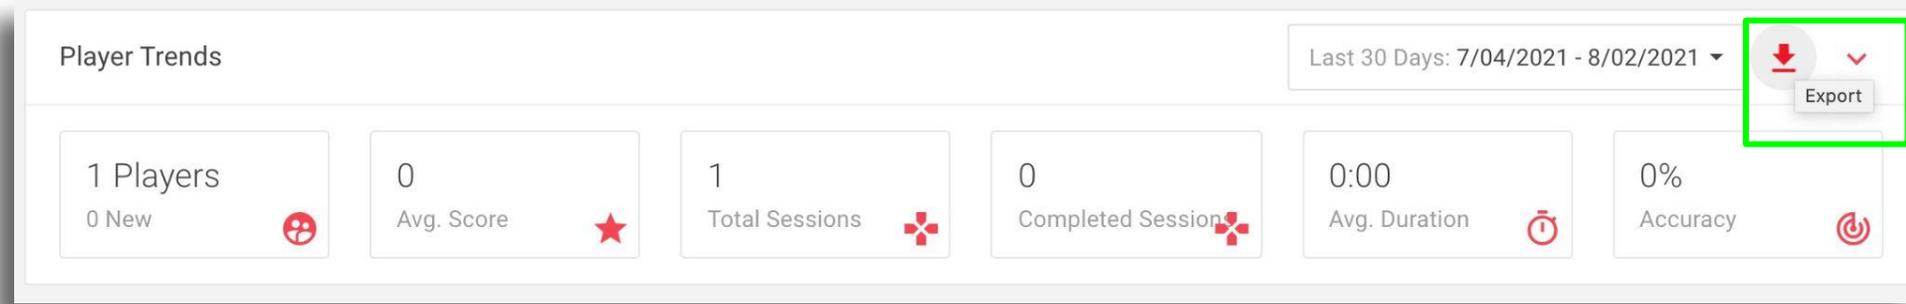

Select a Date Range for the report from the **<Date Picker>** by clicking the small down arrow and clicking **<Apply>**

The screenshot shows the 'the training arcade' Admin Portal interface. On the left is a dark navigation sidebar with the following items: 'Back', 'STATS' (with 'Analytics' highlighted in a green box), 'Leaderboard', 'ADMIN' (with 'Edit Game' and 'Permissions'), and a 'Play Game' button at the bottom. The main content area displays a date picker for 'Last 30 Days: 7/04/2021 - 8/02/2021'. It features two calendar grids for July 2021 and August 2021. The date '1' in August is selected. To the right of the calendars is a list of date range options: 'Today', 'Yesterday', 'Last 7 Days', 'Last 30 Days', 'This Month', 'Last Month', 'Last 12 Months', 'This Year', 'All Time', and 'Custom'. At the bottom right are 'Apply' and 'Cancel' buttons.

Exporting Analytics

Click **<Export>** and the report will automatically download and open an Excel file.

*Reports that are larger may take some time to prepare and these reports will be emailed to the requestor and also available for download via the Notifications feature in the Admin Portal.

Exporting Analytics

Bulk Reports

Reports can be downloaded for more than one game, simply by Clicking **<Export>** on the Main Games Page.

A new menu will popup, from here reports can be **<Named>** (optional).

The Admin or Creator can search for games by **<Game Name>** or **<Created By>**

Select **<All>** or **<Multiple>** games to be included in the report.

To select **<All>**, click the checkbox next to **<Game>** in the header or to select multiple games, select the checkbox next the the game names.

Once ready, reports are shared in a zip file. One file will include the Full Overview Report + data files for each individual game requested.
